Arugalai

Mobile WiFi Required

Doesn't need Internet

As we advance, we need to embrace new, smarter technologies to support our modern life. That's where, Aslaan comes with ARUGALAI - a Wi-Fi based remote technology, which scored more advantages, in particularly security and wide range communication capability - than others in usage.

By installing Aslaan Timer app in a smart phone, a multi task remote, based on Wi Fi technology comes alive. A smart remote is at your hand with extra facilities than any other remote available now. Your phone becomes a Smart Remote too.

Arugalai

Arugalai is a device, which switches on and switches off any electrical appliance connected to it like a remote. It has further capability of doing the On & Off function as you programmed. Arugalai does not require you or your phone or internet connection to act as per your program. We call this program as `Routine`.

You can On & Off all electrical appliances through your Android phone, by the assistance of Aslaan App. Through a Routine, you can run all electrical appliances during a particular time on a particular day automatically.

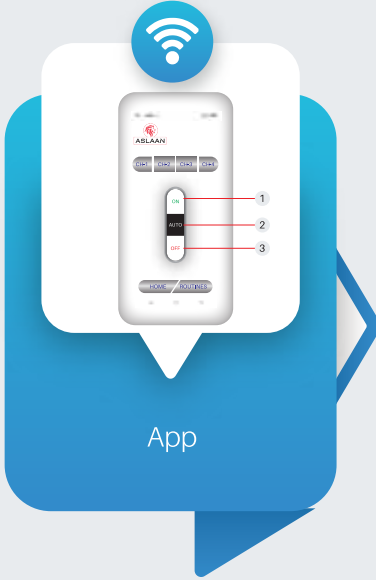

You change your Android phone as a remote, by installing Aslaan Smart App from Google Play store. It has a password protection.

Advantages of Arugalai :

- No internet connection required
- The appliances connected to Arugalai
 - can be operated through the regular switch (manual mode)
 - can be randomly operated through your phone Wi Fi (Remote mode)
 - can be operated automatically through Routines (Auto mode)

No need to share your e-mail id, phone number and location during installation. Very safe to your personal data.

Arugalai never stores or retrieves any data in your mobile. No need to give any such permission to access your phone's camera, contact list or any of your folders. 100% safe.

1. ON
2. Auto - Routine activation Mode - executes On & Off function as stored in Routines
3. OFF

Arugalai
